### ***On Site brick production to 120 bricks/hr***

- Initial business entry model
- Aid organizations'
- Council & Government Departments
- Commercial on site production
- Community Development Projects
- Education and Training
- Owner Builders Hire operators

Light weight 550 Kg ease of transport

Petrol, Diesel or Electric powered

Interchangeable Mould box sizes

Brick sizes 385 x 250 mm  
300 x 275 mm  
290 x 290 mm

Other sizes available on order

Options can include – wind mould rebates and cored holes in bricks to facilitate the installation of services in the 385 x 250mm mould size

Suitable material with a moisture content of approx 8% is shoveled into the sliding feed hopper.

The lever operated hydraulics retracts the feed hopper and the brick is ejected. Each subsequent cycle moves the brick forward for removal and stacking.

Bricks can be stacked on pallets on the slab or around the building for drying and then laid with minimum handling and no transport costs.

Priced from \$27,500 plus GST

Australian designed and built to provide sustainable building products. Giving you the choice to reduce costs and reduce your carbon footprint.
